Electronics and Communication Engineering graduate with hands-on experience in software development, full-stack applications, and machine learning. Completed a Software Development Engineering Internship at Amazon, working on vendor-facing platform using React, TypeScript, Cypress and Java APIs. Skilled in Python, with a strong interest in building scalable and user-focused software solutions.

INTERNSHIP EXPERIENCE

- Amazon** May 2025 – July 2025
Software Development Engineering Intern Bangalore
 - Implemented the Listings Item Update Form feature in Delphi, a vendor-facing chatbot used by Amazon sellers.
 - Developed the form UI using React and TypeScript and integrated it with backend Java APIs.
 - Developed Cypress test suites and executed unit and integration testing to improve software quality.
 - Implemented telemetry metrics for click events to support monitoring and data-driven product insights.
- TechAvidity Business Solutions Pvt Ltd** June 2024 – July 2024
DevOps Intern Bangalore
 - Developed backend features using Spring Boot and Java.
 - Contributed to a Healthcare Management system using Camunda BPM for workflow automation.

PERSONAL PROJECTS

- IoT-Based Beehive Monitoring System** Dec 2025 – Apr 2026
Python, Flask, React, Machine Learning, Raspberry Pi
 - * Designed and developed a full-stack IoT platform for real-time beehive health monitoring using acoustic sensor data.
 - * Built and integrated Flask REST APIs to process sensor streams and serve machine learning predictions for hive-condition analysis.
 - * Developed a React-based dashboard for real-time monitoring, visualization, and management of hive health metrics and device data.
- Image-Based Food Classification and Nutritional Profiling** Jul 2025 – Nov 2025
Python, Deep Learning, CNN
 - * Developed a deep learning system to classify food items from images and estimate nutritional information.
 - * Trained CNN models for food recognition and nutritional profiling using image datasets.
 - * Built a basic web application for image upload, food classification, and nutritional analysis display.
- EEG Abnormality Detection using CNN** Dec 2024
Machine Learning, Deep Learning, Python
 - * Developed a CNN-based model for detecting EEG abnormalities from biomedical signal data.
 - * Applied signal preprocessing and feature extraction techniques to improve classification performance.
 - * Evaluated model performance using accuracy, precision, recall, and F1-score metrics.

EDUCATION

- Madras Institute Of Technology, Anna University** 2022 – 2026
B.E. Electronics and Communication Engineering CGPA: 9.13

TECHNICAL SKILLS

Programming Languages: Python, SQL
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Frameworks Tools: React, Flask, Cypress, Git
Machine Learning: TensorFlow, Scikit-Learn, CNN, Computer Vision

LEADERSHIP ACHIEVEMENTS

- Head of Content Team** - Personality Development Association 2025 – 2026
- Best Outgoing Student** Special Mention Award with Cash Prize 2026
- Best Performer Award** Received for being the Best Overall Performer of 3rd Year March 2025
- Winner** of 7 events conducted at various intercollege technical symposiums April 2025
